The power of the water

A: Introduction

1. **Copy the title of the document**. Make sure that you know how to pronounce it, so listen carefully…

2. **Figures (quantities) are given. Which ones? fill in the blanks or choose the right word**

cubic meters of water past here at about km/h. that's water to about Olympic swimming pools

3. **Choose or find the right word:**

'Standing here you can actually the of the water. that is what have been to do for over years in '

4. **Give the definition of electricity using the following words (**which have been jumbled up!!!!!): you will add the necessary elements (articles, prepositions, relatives or others ….)to make proper sentences

Energy	essence	water	factory	electrons	convert	commonly	electricity	falling	flow

B. Detailed comprehension

5. **What do most hydroelectric stations use?**

- *The water around a natural of a river, for ex: a or*
- *Or a is built across the to the water to the needed to create a*

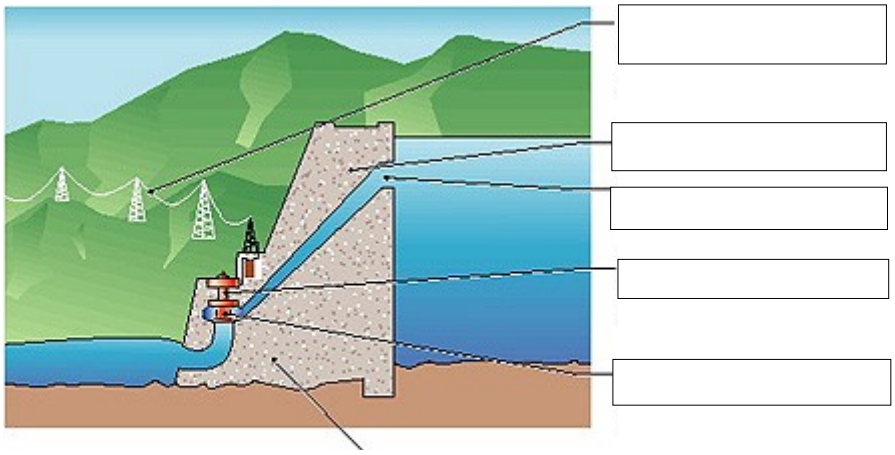
6. **Pronunciation: find out the right sound for the elements underlined**: put the words in the right column

Fill ***feel*** *designed* ***divert*** *built* ***rise*** *raise* *provide* ***driving*** ***hydroelectric*** ***station***

ei (cake)	*ai (bye)*	*i (fish)*	*i: (sheep)*

C. Animation

7. Find out the elements to describe the photo (cross section of a hydroelectric station)



8. Find out the **VERBS** necessary to describe the operations and a few other words which you must have selected for the cross section above

- *Water at the higher level, is* [ ] *in the fore bay.*
- *It* [ ] *through the* [ ] [ ] *into a* [ ] *called the* [ ] *which*
- [ ] *it down to a* [ ] [ ] [ ] *at the lower water level.*
- *The water pressure* [ ] *as it* [ ] *down the* [ ]
- *and it is this pressure and flow that* [ ] *the* [ ] *that is* [ ] *to the generator.*
- *Inside the generator is the* [ ] *which is* [ ] *by the* [ ]
- *Large electro* [ ] *are* [ ] *to the* [ ] *located within* [ ] *of carpet wires called the* [ ]
- *As the generator* [ ] [ ] *the* [ ]*, a flow of electrons is* [ ] *in the* [ ] *of the* [ ]
- *This produces electricity that can be* [ ] *up in voltage through the station* [ ] *and* [ ] *across* [ ] [ ]

9. **Write down the conclusion**

- *The falling water having served its purpose* [ ] *the generating station to the tailrace where it joins the main stream of the river to* [ ] *the cycle of creating* [ ] [ ] [ ] *for* [ ]
